

CHAMPIONSHIP MEASUREMENT PROCESS

Date: August 2024

to the participants in the Master European Championship 2024

Under agreement of SCIRA Italy and the Chief Measurer of the event, to facilitate the verification process the following procedures shall be followed:

1. All boats entering the Master European Championship 2024 shall be weighed and sails stamped only, according to the pertinent DoG. The equipment control will also include tow line, paddle and PFD.
2. The Organizing Committee will post on the official web page:
<https://lnx.svoc.org/2024/07/15/campionato-europeo-master-snipe/>
the Equipment Inspection Sheet (EIS) which shall be filled in by the competitors in the specific section and signed by the measurer once the equipment control is completed.
3. At the Championship, to proceed with the equipment controls, competitors shall present the EIS together with their Measurement Certificate (MC) to the Chief Measurer. To avoid long waiting queues, competitors shall mark their sail number on the list posted outside the verification stations.
4. Those boats with both EIS and MC shall be checked according to the EIS and the DoG and the sails verified (**sails must be presented already measured** and stamped by a SCIRA or Sailing Federation appointed measurer; please remember that **according to RRS Appendix G no digital-like numbers are accepted on sails measured from March 2018**).
5. Once the EIS has been signed by an event measurer the team can finalize the registration at the Regatta Office
6. Boats may be inspected at discretion of the Technical Committee between races only on security items (tow line, paddle, PFD, rudder security system and daggerboard safety line) and sails stamps.
